

NT-WL-H

NetX™ Water Leak Sensor Probe

- Works with the NT-URS Universal Sensor
- Compatible with X-Series Thermostats Only
- Two Wire Connection to the Sensor
- Up to Two Probes for each Sensor
- 6ft Cable Included

GENERAL DESCRIPTION:

The power and flexibility of the NetX Advanced Remote Sensor bus is the best in the industry.

The Network Thermostat NT-WL-H is a simple-to-install water leak sensor probe that connects to either the NT-URS Universal Remote Sensor. Up to two probes can be connected using the remote input terminals.

The NT-WL-H is a horizontal mount probe with strong double stick tape for attachment to the bottom of a drip pan, and two screw holes for mounting to other surfaces.

The probe must be used in conjunction with a NetX Universal Remote Sensor and an X5 or X7 Series thermostat. The X5/X7 thermostat will display a warning message when a leak is detected, can be configured to turn the HVAC equipment off, and to automatically send email and SMS messages.

STANDARD FEATURES:

• **WATER DETECTION FROM 'DIRTY' WATER TO DISTILLED WATER**

• **USE WITH NT-URS OR NT-URS-ULE REMOTE SENSORS**

• **UP TO 2 PROBES CAN BE ATTACHED TO A SENSOR**

• **HORIZONTAL MOUNT WITH EITHER SCREWS OR DOUBLE STICK TAPE**

• **SENSORS CAN BE CONFIGURED FOR HVAC OR OTHER USES**
