FOR IMMEDIATE RELEASE
9/1/2022

NETWORK THERMOSTAT EXHIBITING BOOTH #5041 AT 2022 CEDIA EXPO SEPTEMBER 29TH - OCTOBER 1ST

Grapevine, TX, 9/01/2022– Network Thermostat™, a leading provider of smart[er] connected thermostat solutions for facility energy management and building automation, announced today we will be attending the CEDIA EXPO in Dallas, Texas.

“We are excited to bring to this market our unique solutions to assist integrators entering the commercial thermostat market. Our product line is specifically designed with commercial grade reliability and direct automation integration that is not possible with typical residential smart thermostats. The perfect blend of the commercial IoT world with the CEDIA market.” **John Brower, VP Sales, Network Thermostat**

The Modern touchscreen NetX X5 and X7 Wi-Fi and Ethernet thermostats deliver unprecedented flexibility for Home Automation and Building Automation control. The NetX CloudConnect™ platform provides a state-of-the-art user interface via the cloud and management of thousands of thermostats from any smart device. Embedded in all of NetX’s Wi-Fi and Ethernet thermostats, BACnet and Modbus protocols provide simultaneous communication with central plant systems and commercial/residential automation systems. With nearly 300 objects available, including simple-to-implement NetX 7-Day and 40 calendar-based schedules, 40 special-event schedules, and CO₂ control, NetX continues to lead the way in commercial IoT HVAC control.

About Network Thermostat

In 1995, Grapevine, Texas-based Network Thermostat (NetX) began designing and manufacturing cost-effective electronic and software products to meet the needs for on-site and remote-location control for the heating, ventilation, and air conditioning (HVAC) market. NetX's mission is to deliver user-friendly HVAC solutions with powerful time and energy savings features to our institutional, commercial, and industrial customers. For over a quarter-century, Network Thermostat has been recognized as an industry pioneer and leader in affordable networkable HVAC solutions, winning several awards for products in our industries.
