TAKE CONTROL OF YOUR ENERGY BILLS!

The RP32 line of thermostats: the perfect solution for your **small building, residence, condo, or vacation home**. Using your favorite browser, Net/X™ makes it simple with near effortless scheduling of your daily schedules and vacations. You will never again have to stand in front of a thermostat, trying to figure out the 'thermostat hieroglyphics' for programming your schedules. (You're welcome. ☺)

ADVANCED FEATURES – SIMPLE APPLICATIONS

Net/X thermostats include a myriad of advanced features to help you control your energy usage in your private piece of the world. Intelligent energy efficiency algorithms, selectable temperature recovery, email and text message alerts, keypad lockout, integrated Weatherbug® data, graphical forecasts, and more!

Wi-Fi (b/g) or
10/100Mbps
Ethernet

SIMPLE INSTALLATION

Using our 40+ years of HVAC industry experience on our design team, we've put our knowledge to work for you. With universal equipment control for conventional and heat pump systems, in most cases your Net/X thermostat can be installed by simply matching the existing color-coded wires of your old thermostat. The Connectivity Wizard allows simple connection to your existing network.

SECURE ACCESS WORLDWIDE

Connect to your RP32 thermostats through any browser on your PC, Mac, smart phone or tablet. Registering your thermostats will allow you to access them over the Internet from anywhere in the world, with no monthly or annual fees. Manage one or more Net/X thermostats using your browser or our famous stand-alone Net/X-IP Command Center™ PC software.

Save Time • Save Energy • Save Money
