Unleashing Versatility In HVAC Management

NetX's comprehensive X-Series Wi-Fi and Ethernet thermostats can handle just about any type of HVAC system designed for a luxury residence, including:

- Conventional - Gas / Electric
- Heat Pumps - Air-to-Air, Water Source, Add-On, Dual Fuel
- Radiant Floor - Stand-Alone and Forced-Air Hybrid
- VRF / Mini-Splits - Nearly All Manufacturers

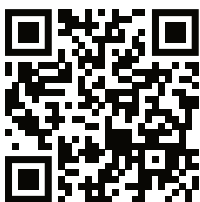

Network Thermostat Longevity & Experience

We're not new to the HVAC controls industry, we're just new to CEDIA. With thirty years (30) of experience providing communications-based thermostats to the commercial marketplace, NetX is now bringing its designs to the Luxury Residential marketplace.
